SUN<sup>x</sup> “Plan For Our Kids” – creating 100,000 STRONG  
Climate Champions by 2030, in every UN State

Climate and Emotion - Guardian 2017

**This chart illustrates one of the key reasons to Act Now on climate resilience. It will save the lives of future generations – our kids and grandkids. We must invest today, to secure that future.**

**Help us create 100,000 “STRONG Climate Champions” by 2030**

# SUN<sup>x</sup> Strong Universal Network

## “A Plan For Our Kids”

### A Letter From Our Founders

Dear Colleague,

We are writing to introduce SUN<sup>x</sup> – Strong Universal Network. It’s the culmination of work on Green Growth & Travelism from the Rio Earth Summit in 1992, with our friend and mentor, the late Maurice Strong, the architect of Rio and so much more. It’s a legacy to his lifetime commitment to sustainable development and to Travel & Tourism as a positive change agent.

SUN<sup>x</sup> focuses uniquely on Climate Change because, without an effective response, it is eXistential in the long-term and massively disruptive going forward. The increasingly evident extreme weather volatility is bringing more shock floods, droughts, heat waves and climate migrants, to more, and more places, more often. It will affect the next generation dramatically.

We will have to commit in deeds - as well as words and awards - to a climate resilient sector, that progressively transforms, in line with the Paris Accords and the SDG, through the eXistential vector of Goal 13.

**SUN<sup>x</sup>** is established to help just that, through a global innovation / learning exchange for Climate Friendly Travel (measured: green: 2050 proof), and a cadre of committed neXt generation transformation advocates. This next generation of SUN<sup>x</sup> “Champions” will help to drive the behavioural change and influence the fundamental government and industry actions needed. We intend to make a positive leading-edge contribution in this area.

**We have introduced the “Plan For Our Kids”- 100,000 STRONG Climate Champions by 2030 as a vehicle to achieve this goal. We are seeking Partners from business / academia/ government, who share our world view, and want to work with us to help encourage and empower tens of thousands of likeminded, connected, committed, graduate trainees and lifetime learners for progressive change.**

## “A Plan For Our Kids”

### Executive Summary

Travel & Tourism must intensify its response to existential Climate Change, to deal with new norms of dangerous atmospheric pollution and dynamically extreme weather. This SUN<sup>x</sup> plan will create a movement for 100,000 industry activists by 2030, advancing Climate Friendly Travel ~ measured: green: 2050 proof ~ to support the Paris Accords & SDG13.

It calls for the industry, through an enlightened CSR vision, to join with [SUN<sup>x</sup>](#) in SDG 17 partnerships through the STRONG Climate Champions program for graduates, committed to help society bend the Paris Curve towards the New Climate Economy. It targets every UN State and links academia, industry and civil society in the building of the movement. It has a Lifetime Learning Portal; a graduate Climate Friendly Travel course; support systems in Europe, China, Africa and Latin America, and a planned network of Climate Innovation Centres, in every country by 2030, from its base in Limburg Belgium.

It will be managed with IRISS and t-Forum in Naples Italy: with CBCGDF to extend the system in China and Belt / Road Countries: with Plan 21 in Latin America to bring IBM Watson Analytics into play, as well as with Tourism 2030 and Copernicus in Europe. We will hold an annual Strong Climate Summit for Students in 2019 with Les Roches in Switzerland: work with the Earth Focus Foundation in Geneva, to deliver a Climate cartoon series for kids, and host an annual Climate SmART Award for Museums, with Leading Cultural Destinations.

If the leaders in our sector give scholarships in the places they operate, it will reach 100,000 Strong Climate Champions way in advance of 2030. Promoting the donors' CSR and Climate Resilience vision. Catalysing more scholarships from their supply chain, impact investors and public sources. As well as providing transformation leadership.

***STRONG Climate Champion Packages*** are €5000 and give lifetime learning to 50 graduate students focusing on Climate Friendly Travel. Each one gets lifetime access to the SUN<sup>x</sup> Climate Portal which includes our Climate Friendly Travel course. One package a year for every UN State, by 2030 will produce 100,000 advocates for Climate Friendly Travel.

SUN<sup>x</sup> is a legacy program for Maurice Strong's half century of sustainability commitment, his focus on existential Climate Change and vision of Travel & Tourism as an adaptation leader. It's conducted in a Belgian non-profit Green Growth & Travelism Institute, established in 2010.

We are a global advocate for Climate Friendly Travel – measured to manage: green to grow: 2050 proof to innovate. We support transformation to the New Climate Economy and implementation of the Paris Accords and SDG 13.

Our 2030/2050 vision is for an evolving, leading edge Climate Adaptation sector, supported by a worldwide movement of STRONG Climate Champions, plugged in to our Lifetime Learning Portal and Climate Innovation Centres.

# SUN<sup>x</sup> Strong Universal Network

## “A Plan For Our Kids”

This next generation of SUN<sup>x</sup> “Champions” will help to build the thinking; drive the behaviour, identify innovations and influence the fundamental government and industry actions needed. We intend to make a positive leading-edge contribution in this area.

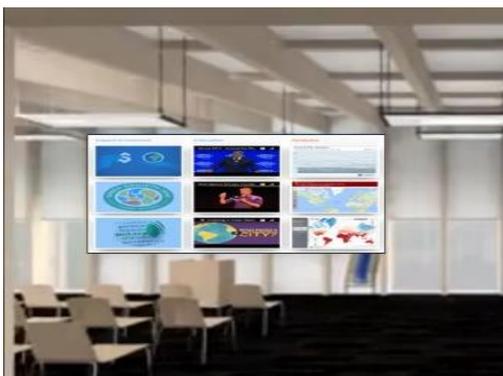

We have introduced the Maurice Strong Climate Champions Program as the key delivery vehicle, to incentivise student membership in our system and encourage Partners to engage for CSR and community well-being.

Its Board includes Hanne Strong: Ignace Schops Goldman Award environmentalist: Jinfeng Zhou, Chinese biodiversity leader: Alain St Ange former Tourism Minister Seychelles: Felix Dodds Founder Stakeholder Forum & Geoffrey Lipman former President WTTC / Assistant Secretary General UNWTO. It has a Global Advisory Council from travel, environment, education & civil society, as well as a small, committed support team.

We have developed a sustainable financing program and are building SDG 17 Partnerships for outreach and local delivery.

**We are seeking Partners from business / academia who share our world view, and want to work with us to empower tens of thousands of likeminded, connected, committed, graduate trainees and lifetime learners for progressive change. Partnership opportunities include:**

- Paris / SDG 13 alignment
- Green market positioning
- Graduate Trainee & School links
- Global & local media promotion
- Industry & Academia recognition
- SUN<sup>x</sup> events & support services

## “A Plan For Our Kids”

### Why SUN<sup>x</sup> Partnership is win-win

We want to encourage [100,000 Strong Climate Champions by 2030](#) - it is ambitious but achievable. We intend to start small and grow over the 12-year span of the SDG and the 32-year span of the Paris Accords. Our budget is transparent, with tightly controlled costs and a realistic revenue channel, based on a single, low lifetime membership fee and cloud based evolving learning systems.

**Each STRONG country program is €5000**, this enrolls 50 STRONG champions into the SUN<sup>x</sup> system and its Climate Friendly Travel focus. They will be linked with sponsors, receive a membership certificate and a copy of the e-book – “Remembering Maurice Strong.”

We have put the basics in place and self-financed the start-up. In the coming decade, with visionary partners, we will deliver hundreds of STRONG Climate Champions in every UN state, if the goals are right, the partnerships are strong, and the process is kept simple.

**We need SDG 17 partners to succeed in our mission.** We want to build a global movement that continues Maurice Strong’s sustainability vision, by linking Champions for Climate Friendly Travel with Communities that want to become climate smart, through the SUN<sup>x</sup> Exchange. We want to keep a permanent focus on learning and innovation because climate change is eXistential and the global socio-economic dynamics are massive, complex and ever-shifting.

**Partners will engage with SUN<sup>x</sup> to enhance their CSR, build climate-smart, graduate trainee pools and support their local communities.** Our program has been designed to complement the SDG educational and training initiatives that companies are setting in place individually and through their trade organizations. In those communities that sponsor a SUN<sup>x</sup> Centre we look forward to working even closer together, to take advantage of an expanding global network.

- **We hope that Industry, Government, and Philanthropists** will see the immense good that can come from groups of lifetime learners, committed to making a difference in their own communities and to their own kids’ futures.
- **We hope that Universities** will see the merit of a short online, Climate Friendly Travel Course that can be an elective for any education discipline. In the final analysis, virtually everyone is a traveller, or a host and thus a potential Champion.
- **We hope that Communities** will see value in a SUN<sup>x</sup> Centre to focus attention on climate learning and innovation, as well as to take advantage of an expanding global network facing a common eXistential challenge, and with a collective Climate Friendly Travel response.

**We stand ready to work together for what former UN S.G. Ban Ki Moon called “The Future We Want”, by ensuring that the greatest single threat to humanity is met now, with thoughtful, mutually beneficial collaboration, shared innovation and timely action.**

**That will be Maurice Strong’s legacy for the Travel and Tourism sector.**

## Maurice Strong Climate Champions

***The Maurice Strong Climate Champions Program celebrate his pioneering, visionary contribution to Sustainable Development: his belief that Climate Change is the existential human challenge and that Travel & Tourism, can adapt to play a pivotal leadership role in the global response.***

We must do this sustainably - as a small Foundation we have committed 10 STRONG Champion Packages in 2019 from SUN<sup>x</sup> and our first Anchor Sponsor, Ingle International. We are seeking more.

Our operational Academic Partnership is with IRISS and t-forum in Naples Italy. We will work together on the program. Our focus will be Climate Friendly Travel and we will support the work of IRISS on Sustainable Cultural Heritage and of t-Forum on integrating Academia and Industry. We will engage other academic and learning networks, from our base in Belgium.

STRONG Champion packages will create a cadre of young smart people committed to climate resilience and a desire to help the sector embrace Climate Friendly Travel – measured, green & 2050 proofed.

We have created an innovative sponsorship program, to build a movement for climate resilience from the ground up and provide strong links for communities and business.

We have created €5000 sponsorship units, each providing 50 STRONG Climate Champions with access to our Lifetime Learning system on Climate Resilience.

***We invite sponsors to engage for their CSR - particularly on Climate Resilience, Education, and strengthened Graduate Training Programs.***

## Appendix

### Maurice Strong - Thoughts on Travelism and Humanity

***“In its multiple dimensions, Travelism – the travel & tourism socio-economic value chain - is one of the most pervasive industries, driving the processes of globalization and contributing to the economy of even the smallest communities, providing an ever-expanding link between local and global”***

*At the core of this challenge is the need for the travel industry to become a true leader in the greening of the economy. Indeed, the industry must see this as an imperative which will require the full commitment of its own leaders. Even at the most difficult economic times, travel increases and with it the environmental impacts of travel, particularly the increasing greenhouse gas emissions it produces.*

*This is clearly a time of momentous change on a scale that will have a profound effect on the human future. The travel community has a responsibility to consider how green Travelism contributes to this challenge and can best contribute to its solutions.*

*The environment as nature’s capital is the greatest single resource for tourism and this is a powerful incentive for the industry to protect it. It makes green tourism a necessity for the industry, not merely a fringe issue too often receiving more lip service than real commitment...*

*The industry must integrate “green” as an absolute necessity for its own future and the responsibilities it has for the entire human future. Simultaneously, this new Travelism vision and its commitment to action must be integrated into the mainstream movement for radical global change.*

*Today the industry needs an enlightened but radically reinvigorated agenda for green growth transformation. You have made notable progress on which the industry can now build. But it needs real, continuing action, targets, measurement, and a new mindset that links economic, climate, social and environmental response and welcoming of global-local inclusion as fundamental. I am convinced you can make much more of your unique positioning if you fully integrate the interests of local communities into overall strategic policy in a meaningful way. In a sustainable green growth world, destinations have ultimate responsibility for their destiny.*

***Let me also call your attention to a fundamental issue in this change agenda – the importance of linking environmental and Travelism education: particularly for the next leadership generation which will have to drive the most challenging changes. That transformation must be started now and will be carried on by our children and grandchildren. Our task is to make the right choices now. No issue is more important, in that context than the growing risks of climate change which provides the greatest threats ever to the sustainability and security of life everywhere.***

## SUN<sup>x</sup> Strong Universal Network “A Plan For Our Kids”

*Travelism is a both victim and contributor for climate change. It is now widely recognized that Travelism accounts for some 5% of global carbon emissions and this is growing rapidly with aviation the leading and most rapidly growing contributor.*

*Travelism plays a key role in protecting the earth's natural capital – its biological diversity, the services that nature provides on which so much of our life and wellbeing depends. The eco systems – mountains, forests, islands, waters and coastal areas which provide some of the most attractive venues for tourism are nature's gift to humankind which it is in our interest and responsibilities to protect.*

*Travelism also provides an immense range of opportunities for economic development and relief from poverty in some of the most disadvantaged areas. Agenda 21 for Travel and Tourism prepared in response to the 1992 Earth Summit and more recently the very detailed report by UNEP on “The green economy, pathway to sustainable development and poverty eradication” define the many ways in which green tourism is essential to the development of the green economy.*

*No nation will have a greater positive impact on these developments than China where I spend much of my time these days and with which I have had a long relationship. After a century of internal turbulence and conflict, China has again emerged as one of the world's great nations with an immense and growing impact on its future. No nation has a greater variety and diversity of tourist destinations from the habitats of pandas to its vast heritage of historic, cultural and national wonders. The Chinese are great tourists within their own countries. Its domestic market is today twice as big as all of the international travel in the world. However Chinese international travel – where they are poised to become the leading global player - is less than 5% of its total travel.*

*The Chinese are now fully committed to developing a green economy. The greening of its economy is a top priority, and this will clearly contribute to its attractiveness for tourism. No country has greater potential for leadership in green tourism than China and this will continue to open-up unprecedented opportunities for the greening of the industry.*

***Finally, my personal experience with travel and the environment have been integral to my own life. It is out of my own experiences that I have become so firmly committed to the systemic relationship between the environment and green Travelism and indeed the imperative for this sector to fulfil its leadership destiny through the transition.”***

### Afterthoughts - Geoffrey Lipman

*“History is biography” so said Ralph Waldo Emerson and he might have been foreseeing the incredible life of Maurice Strong, a man with a brilliant mind and a guiding hand in so many building blocks of today’s global sustainable development agenda. Be it the UN system, the World Bank, the World Economic Forum, the Earth Council and so many more public and private sector entities. Including I’m happy to say in the influential Travelism (Travel & Tourism) sector where he had a deep personal passion for its potential as a sustainability change agent.*

*We talked increasingly about education and his firm belief that the next generation will be the ones who make or break the response to existential climate change. He encouraged us to build an interested community inside the sector and over time it seemed that Travelism could perhaps become a key element of his education vision.*

*In 2012, during the Rio+20 Summit, Maurice and I appeared on a platform organized by UNWTO to promote sustainable Tourism. I presented him with the first copy of my co-authored book on Green Growth & Travelism - with essays from 50 Leaders inside and outside the sector. It was dedicated to him for his inspiration & never-ending persistence in encouraging us to “go green” and his commitment to the industry’s potential. In the preface, which he handwrote, he was as ever gracious in his praise for the industry and equally tough in his admonition that we simply were not going far enough fast enough.*

***He pointed to climate change as the most serious challenge facing humanity and stressed the urgency of curbing carbon emissions. As we advanced, the Travelism education project, it evolved into a climate focused initiative, simply based on the premise that if existential means anything that’s where we should concentrate.***

*I think he would have been pleased with our announcement on July 1st, 2017 of our intention to develop the Maurice Strong Legacy Scholarships and “Strong Champions”. It was Canada’s 150th Anniversary and we thought how great it would be to create a lasting memory focused on the next generations. We did it because despite all his global accomplishments, Maurice was at heart a great Canadian. He cherished his humble roots, his time spent with First Nation people, his sustainability transformation of Ontario Hydro and his international service for Canada.*

*It’s this humility / humanity that we want to embed in the Maurice Strong Legacy Scholarships. As we build Partnerships and Sponsorships around the world, we will look for those who share a vision of responding to climate change from the ground up, as well as the top down. Who believe this growing network of smart young Strong Climate Champions - committed to advancing the case for climate resilience through Climate Friendly Travel, will do much to keep Maurice Strong’s vision alive.*

*“Remembering Maurice F. Strong - Tributes & Reminiscences ” ECPD 2018*

## Climate Friendly Travel: A 21<sup>st</sup> Century Paradigm Shift

**SUN<sup>x</sup> is about Climate Change because it’s eXistential** - if we don’t act now to fix fossil fuel addiction our grandchildren will freeze or fry. The intensity will accelerate over coming decades, as the world community builds a progressive, shared response.

**SUN<sup>x</sup>** will help Tourism destinations and stakeholders build Climate Resilience in line with Paris Agreement & SDG 13 targets through a new concept of “Climate Friendly Travel”<sup>1</sup>

**Climate Friendly Travel is a template for sustainable Travel and Tourism that is Paris Climate & SDG linked. It measures & manages positive and negative impacts coherently. It has Green Growth at the core - low carbon, inclusionary, nature-based “re-connection”. It’s 2050-focused, reflecting Paris Agreement Carbon Reduction targets and the World Economic Forum’s 4<sup>th</sup> Industrial Revolution**

The Paris Agreement calls for a gradually strengthening mix of voluntary national carbon-reduction targets, diminishing dependence on fossil fuel, a new era of renewable energy resources, biodiversity conservation and smarter, greener lifestyles. Its national carbon reduction targets aim to collectively stabilize global temperature increases at no more than 2<sup>0</sup> C by 2050 – and ideally 1.5<sup>0</sup>. The essence of the Paris Agreement and the SDG is that they will be “evidence based”, with measured targets and indicators. The targets will be intensified over time, based on performance, and evolving proven scientific results.

This will require increasingly complex yet coherent actions - at international, regional, national and local levels, with a whole new focus on measurement and management of impacts. Every community will have its own starting point, local socio-economic characteristics, goals, and pace of change.

It fits well, with the Travelism sector (Travel and Tourism ecosystem) – that is beginning to grapple with the reality of what it has promoted as “a force for good” – increasingly challenged in the evidence-based Climate / SDG era.

It is broad enough to cover existing forms of sustainable tourism, green enough to reflect different areas of focus and long range enough to allow progressive adaptation. It is a framework for SUN<sup>x</sup> graduate education & training and Maurice Strong Legacy Scholarship programs.

**Climate Friendly Travel : Online Learning for SUN<sup>x</sup> Champions**

This online course for SUN<sup>x</sup> Members is also designed as a graduate development and training module for environment, travel & tourism (Travelism) careers. It is also a lifestyle guide for the neXt generation and their travel habits. It is multimedia driven, with curated global public domain content.

At the end of the course, students will be able to understand the meaning and relevance of eXistential climate change. They will understand the potential for to support climate resilience and help sector transformation. They will be eligible for the annual Maurice Strong RefleXions Conference.

The course is for one week on-line, or in class delivery, and has been designed as an elective for any university graduate or post-graduate program. It is supported by a web delivered database relying heavily on curated multimedia visual, audio and data feeds.

**SUN<sup>x</sup> Council of Advisors**

SUN<sup>x</sup> is supported and managed by the Belgian Green Growth & Travelism Institute (GGTI) with a small management team and an international Advisory Council from around the world. It includes environmentalists, business leaders, civil society champions, climate scientists, public sector decision makers, technology innovators and communications experts. The Council will expand over time and be the core of our worldwide community of SUNx Champions
