

SUNx Malta Climate Friendly Travel System

SUN^x Malta is a not for profit, EU based, organization, partnered with the government of Malta that has created a unique, low cost, system to help companies & communities transform to the New Climate Economy.

We continue the vision of our mentor, the late Maurice Strong – Climate Activist & Sustainable Development pioneer, acting as a catalyst for sector change & a conduit to mainstream UN Climate & Sustainability targets.

We advance and enable “Climate Friendly Travel” (CFT) ~ Low Carbon: SDG linked: Paris 1.5 trajectory, building SDG 17 Partnerships, with a close collaboration with, and support for, WTTC Climate Neutral 2050 action. In this context we deliver, an annual State of the Sector Report and related Think Tank, to help the Travel & Tourism sector to collectively increase its Climate Friendly Travel action. We have put in place a “SUN^x Malta Green and Clean transformation System” to deliver on this with support for the 17 SDG’s & Paris 1.5 Target.

The system has two core elements – Action and Education

1. **ACTION** is supported by *The SUN^x Malta Climate Friendly Travel Registry* for 2050 Climate Neutral & Sustainability Ambitions. It is the Travel & Tourism entry to the UNFCCC Climate Action Portal. All companies and communities can commit, plan, and record their action programs in the Registry and receive support to achieve their green sustainability goals and clean carbon reduction targets.
2. **EDUCATION** includes a Climate Friendly Travel Diploma with the Institute for Tourism Studies in Malta; an Annual Maurice Strong Youth Summit and Awards; as well as a “Plan for our Kids” to train 100,000 Strong Climate Champions, across all UN States by 2030.
